

# CLEAN BLEED™ MAT

The **Clean Bleed™ Mat** has been designed to support any simulation scenario, with any brand of trainer, where external blood or fluid loss is a key indicator and measure of emergency interventions taken, such as gunshot wounds, post-partum haemorrhage or post-operative bleeds.

70400

NEW

By increasing realism, we develop true to life responses.

*Learning has never been more lifelike*

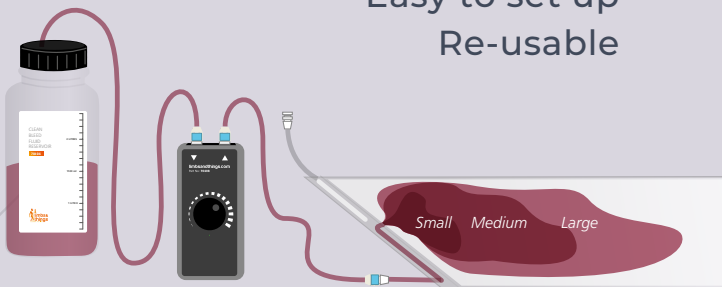

[limbsandthings.com](https://limbsandthings.com)

Designed to support different scenarios

The **Clean Bleed™ Mat** is independent of any training system and can be used alongside both simple and complex training models (as well as simulated patients) for use in simulation.

No mess  
Controllable fluid flow  
Easy to set up  
Re-usable
