CHEST DRAIN & NEEDLE DECOMPRESSION TRAINER

61230

Our Chest Drain and Needle Decompression Trainer has been designed to meet the specific requirements of healthcare professionals training in surgical or guidewire-assisted thoracostomy and thoracentesis.

This product allows for a variety of chest drain insertion techniques to be performed including ultrasound-guided techniques.

IDEAL FOR **ATLS** COURSES

ULTRASOUND EPIDURAL & LUMBAR PUNCTURE MODEL

61002

61025

For more advanced learning needs, the trainer allows for acquisition of ultrasound guided skills techniques in the injection of local anesthetics, lumbar puncture, collection and measurement of CSF, and epidural administration.

PARACENTESIS TRAINER

60100

60111

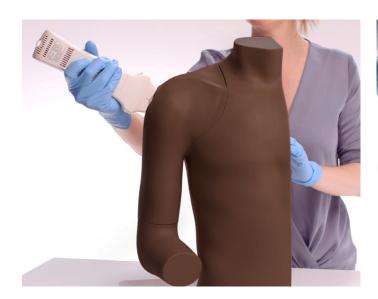

This trainer fulfills the fundamental component of core medical training in diagnostic and therapeutic techniques of Paracentesis. Both landmark and ultrasound guided techniques can be practiced.

Trainees are able to identify the echogenic anatomy enabling them to learn how to safely insert a needle or catheter into the peritoneal cavity.

KNEE ASPIRATION & INJECTION TRAINER WITH ULTRASOUND CAPABILITY

70103

70114

An anatomically accurate adult knee model for aspiration of synovial fluid and joint injection from both the lateral and medial aspects, using ultrasound-guidance or palpation.

The robust sealed knee includes knee joint, patella, patellar tendon and the suprapatellar space.

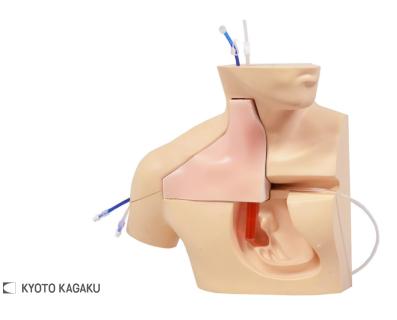

ULTRASOUND CENTRAL VENOUS CATHETER INSERTION SIMULATOR MK 3

ККМ93С

A realistic model for teaching central line management including cannula approaches, and the insertion of central venous catheters into the superior vena cava, with and without ultrasound guidance.
